

# Welcome

**Today's meeting is about the access management plan for Idaho 55 in Canyon County. It is part of a long-term corridor study for Idaho 55.**

The plan will include ways to reduce accidents while maintaining speed and traffic flow – such as limiting left turns at major intersections.

Access management will be phased in over time through a partnership of local governments and the Idaho Transportation Department.

Your input today will help ITD refine the draft of the access management plan.
